

PROFILE

Dependable IT professional with over eight years of hands-on experience diagnosing, repairing, and supporting laptops, desktops, and mobile devices across hardware and software platforms. Proven ability to troubleshoot complex technical issues, manage device setup and configuration, and communicate solutions clearly to non-technical users. Experienced working with spreadsheets, word processing, database tools, and communications software. Upland resident committed to supporting technology in education.

EXPERIENCE

Apple - Technical Expert

January 2022 – July 2026

Rancho Cucamonga, CA

- Diagnosed and resolved advanced hardware and software issues on laptops (MacBook), desktops (iMac, Mac Mini, Mac Pro), tablets (iPad), and mobile devices (iPhone) in a high-volume environment.
- Performed component-level device diagnostics and repair, ran system-level tests, isolated root causes, and documented technical findings for each service case.
- Configured device settings, managed data migration and backup processes, set up user accounts, and ensured network connectivity across Wi-Fi, Bluetooth, and cellular systems.
- Mentored teammates on troubleshooting methodology, documentation standards, repair quality, and service best practices. Handled escalations requiring advanced diagnostic reasoning.

Apple - Technical Specialist

September 2018 – January 2022

Rancho Cucamonga, CA

- Supported end-user device setup, data transfer, software installation, operating system updates, security configuration, connectivity troubleshooting, and hardware repair across the full Apple product line.
- Guided users through account management, password resets, privacy settings, cloud-service configuration, and email/calendar setup.
- Translated complex technical concepts into clear, step-by-step instructions for users with widely varying technical backgrounds.

Apple - At Home Advisor

September 2019 – June 2020

Remote

- Delivered remote technical support for laptops, desktops, and mobile devices without physical device access, using structured questioning and step-by-step remote troubleshooting procedures.
- Documented symptoms, diagnostic steps, actions taken, and resolution details for each case. Maintained service-level productivity and communication quality while working independently in a fully remote environment.

MarketSource - Wireless Manager

June 2015 – September 2018

Fontana, CA

- Managed daily wireless retail operations, trained staff on mobile hardware, carrier activation systems, and device troubleshooting procedures.
- Resolved complex device activation errors, porting issues, and carrier account conflicts. De-escalated customer concerns in high-pressure situations through clear communication and technical competence.

TECHNICAL SKILLS

Hardware: Laptops, desktops, tablets, mobile devices, printers, peripherals, component-level diagnostics and repair

Software: Windows, macOS, iOS, iPadOS, ChromeOS, Microsoft Office (Word, Excel, Outlook), Google Workspace, database management tools

Networking: Wi-Fi configuration, Ethernet, Bluetooth, TCP/IP fundamentals, VPN, network troubleshooting

Systems: Device imaging, user account management, data migration, backup and recovery, remote desktop support

Other: Technical documentation, ticketing/case management systems, inventory tracking, training and mentoring, HTML/CSS/JavaScript, GitHub

RELEVANT PROJECTS

Local AI Lab

Hands-on work with ChatGPT, Codex, Gemini, Google AI Studio, Ollama, and local language models to evaluate practical uses, limitations, and integration into technical workflows.

AI-Assisted Workflow Tools

Evaluated and integrated AI tools (ChatGPT, Codex, Gemini, Google AI Studio) into technical workflows to improve documentation, troubleshooting, and process efficiency.

Web & Application Development

Built and maintained websites and applications using HTML, CSS, JavaScript, Firebase, and GitHub — demonstrating proficiency with database systems, communications software, and version control.

Digital Content & Publishing Systems

Managed file organization, metadata, formatting, and digital asset workflows across multiple publishing and content creation projects.
