

PROFILE

Technical support and customer-experience professional with approximately eight years of experience delivering Level 1 and Level 2 IT support across in-person, hybrid, and remote environments. Proven track record diagnosing hardware, operating systems (macOS, Windows, iOS, Android), network connectivity, and client software while partnering closely with creative and production teams. Adept at root-cause analysis, workstation deployment, user account provisioning, technical documentation, and cross-functional communication. Former Vice President of the Game Development Club at Chaffey College with practical experience in studio production tools (Microsoft Office Suite, Adobe Photoshop, Illustrator, Premiere, Lightroom, Autodesk Maya, Visual Studio Code) and lifelong familiarity across nearly every PlayStation generation (PS1 through PS5), custom PC gaming rigs, and Nintendo hardware.

TECHNICAL SKILLS

Systems & Workstations:

Windows (Client Troubleshooting & Performance Tuning) • macOS • Linux Fundamentals • iOS • Android • Workstation Build & Imaging • Remote Support Tools

Productivity & Studio Tools:

Microsoft Office Suite / M365 (Teams, Outlook, Word, Excel, PowerPoint) • Adobe Creative Cloud (Photoshop, Illustrator, Premiere, Lightroom) • Autodesk Maya (3D Animation) • Visual Studio Code • User Provisioning & Permissions

Hardware & Gaming Platforms:

Workstation Desktops & Laptops • Printers & Scanners • Studio A/V & Video Conferencing Hardware • Component Diagnostics & Repair • PlayStation Platforms (PS1–PS5) • Custom PC Gaming Rigs • Nintendo Hardware

Networking & Operations:

TCP/IP • DNS • DHCP • VPN & Remote Access • Enterprise Storage (NAS/SAN Concepts) • Incident & Service Request Management • Asset Tracking & Inventory • SOPs & Knowledge Base (KB) Documentation

EXPERIENCE

Apple — Technical Expert

Rancho Cucamonga, CA | January 2022 – July 2026

• Delivered Level 1 and Level 2 hardware, software, OS, network, and cloud-service support in a fast-paced, high-volume environment.

• Performed comprehensive component diagnostics, device imaging, data migration, performance tuning, and hardware repairs under strict quality and service standards.

• Diagnosed and isolated root causes for complex software conflicts, synchronization errors, network connectivity/VPN issues, and account security policies.

• Managed critical escalations and high-priority recovery situations with empathy and precision; mentored and trained team technicians on diagnostic methodology, SOP documentation, and customer communication best practices.

Apple — Technical Specialist

Rancho Cucamonga, CA | September 2018 – January 2022

• Supported end-user computing including workstation provisioning, operating system setup, data transfers, backup validation, and peripheral troubleshooting.

• Translated complex technical concepts into structured, step-by-step guidance for users with diverse technical proficiencies, ensuring seamless technology adoption.

• Documented detailed incident symptoms, troubleshooting steps, and resolution outcomes in ticketing systems to maintain accurate inventory and asset records.

Apple — At Home Advisor

Remote | September 2019 – June 2020

• Delivered remote technical triage and multi-tier support without physical device access using structured questioning, active listening, and remote support tools.

• Supported remote network connectivity, software installations, account permissions, and collaboration platforms for distributed end users.

• Maintained complete case documentation and knowledge base updates while consistently meeting and exceeding productivity and quality metrics.

MarketSource — Wireless Manager

Fontana, CA | June 2015 – September 2018

• Led daily wireless and mobile technology operations, trained support staff, managed hardware inventory tracking, and resolved escalated device and network connectivity issues.

PROJECTS

Application & Game Prototypes: Built and troubleshooted interactive web, mobile, and game prototypes using Visual Studio Code and modern frameworks, isolating UI/logic defects and validating reliable code fixes.

Right Side Up Bible & Digital Platform: Designed and maintained responsive web applications, integrating cloud databases (Firebase/Firestore), API endpoints, and multi-device usability testing.

Local AI & Automation Lab: Hands-on work with local LLMs (Ollama, APIs) to evaluate automated technical documentation, script-assisted triage, and repeatable troubleshooting workflows.

EDUCATION & LEADERSHIP

Chaffey College — Computer Information Systems; Business & Technology; Arts & Humanities

Leadership & Focus: Vice President, Game Development Club • 3D Animation (Maya) Coursework

DeepLearning.AI / Coursera — Generative AI with Large Language Models

Fontana High School — High School Diploma

Rancho Cucamonga, CA

Coursera Certification

Fontana, CA
