Hiring Team & Studio IT Leadership
Sony Interactive Entertainment (PlayStation)
Playa Vista, California

Dear Hiring Team at Sony Interactive Entertainment,

I am writing to express my strong interest in the Studio IT Support Specialist position at Sony Interactive Entertainment in Playa Vista. With approximately eight years of dedicated technical support and hardware diagnostics experience across in-person, hybrid, and remote enterprise environments—combined with a lifelong passion for gaming technology and the PlayStation brand—I am excited about the opportunity to deliver reliable, high-performance IT support to SIE's creative and production teams.

Throughout my tenure at Apple as a Technical Expert, Technical Specialist, and At Home Advisor, I provided Level 1 and Level 2 support across macOS, Windows, mobile devices, network connectivity, and cloud productivity platforms. My work focused on rapid root-cause isolation, component-level repairs, workstation imaging, data migrations, performance tuning, and access provisioning. In high-pressure studio and retail environments, I earned a reputation for maintaining composure during critical incidents, de-escalating complex technical challenges, and developing clear documentation and standard operating procedures (SOPs) that enabled teams to work without interruption.

What excites me most about this role is the opportunity to bring together technical rigor with my deep familiarity with game development environments. During my time at Chaffey College, I served as Vice President of the Game Development Club and completed hands-on coursework in 3D animation using Autodesk Maya, alongside extensive practical experience supporting and using the Microsoft Office Suite (Word, Excel, PowerPoint, Outlook, Teams), Adobe Creative Cloud (Photoshop, Illustrator, Premiere Pro, Lightroom), and Visual Studio Code. Furthermore, as an avid, lifelong gamer, I have owned and maintained nearly every PlayStation console generation since the original PlayStation 1—spanning the PS1, PS2, PS3, PS4, and PS5—alongside custom PC gaming rigs and Nintendo hardware. This gives me an intuitive understanding of the creative software, workstation performance tuning, and audio/video collaboration setups essential to game studio production.

I thrive in collaborative, fast-paced environments where proactive troubleshooting and strong interpersonal relationships build trust across teams. Based in Southern California, I am fully prepared to support your Playa Vista studio onsite and participate in scheduled on-call support rotations. Thank you for your time and consideration, and I welcome the opportunity to discuss how my technical skills and enthusiasm for PlayStation can support SIE's ongoing production success.

Sincerely,

Matthew J. Solano
