

Matthew J. Solano

Upland, California | mjsweb.github.io

PROFESSIONAL SUMMARY

Product-focused technology professional with approximately eight years of experience solving complex technical problems at Apple while independently designing and building AI-assisted digital products. Experienced translating ideas into working prototypes using modern AI development tools including ChatGPT, Codex, Gemini, Google AI Studio, Flutter, Firebase, Ollama, and ComfyUI.

Passionate about bridging product design and engineering through rapid iteration, practical UX thinking, AI-assisted coding, and continuous experimentation. Comfortable taking ideas from concept through implementation while collaborating across technical and non-technical disciplines.

CORE SKILLS

▸ AI-Assisted Product Development	▸ Rapid Product Prototyping	▸ UX Thinking
▸ Product Discovery	▸ AI Coding Assistants	▸ Flutter Development
▸ Firebase	▸ Vibe Coding	▸ Prompt Engineering
▸ Front-End Development	▸ Product Iteration	▸ User-Centered Design
▸ Cross-functional Collaboration	▸ HTML / CSS / JavaScript	▸ GitHub
▸ Technical Documentation		

PROFESSIONAL EXPERIENCE

Technical Expert

September 2018 – July 2026

Apple — Rancho Cucamonga, CA

- Solved complex technical problems by identifying root causes, communicating solutions clearly, and improving customer outcomes—strengthening the product-thinking and user empathy skills driving customer satisfaction.
- Guided customers through technical workflows, translating complex concepts into intuitive step-by-step experiences that improved usability and customer confidence.
- Collaborated cross-functionally with team members and leadership to streamline service processes, reduce resolution times, and elevate the end-to-end customer experience.
- Consistently delivered high-quality interactions under pressure, balancing technical precision with clear, empathetic communication across diverse audiences.

EDUCATION & CERTIFICATIONS

Associate's Degree — Computer Information Systems	Chaffey College
Associate's Degree — Business & Technology	Chaffey College
Associate's Degree — Arts & Humanities	Chaffey College
Generative AI with Large Language Models	DeepLearning.AI / Coursera

PROJECTS

- Right Side Up Bible

Founder • Product Designer • AI Developer

 - Designed a complete Bible reading experience focused on readability, note taking, responsive layouts, maps, and study workflows.
 - Rapidly iterated features using AI coding assistants and Flutter.
 - Conducted continuous UX refinement through prototype testing and implementation.
- Right Side Up with God

Founder • Product Designer

 - Designed a connected digital ecosystem spanning web, publishing, music, AI tools, and community resources.
 - Built responsive interfaces and integrated multiple products into a unified user experience.
- Local AI Lab

AI Developer • Product Prototyper

 - Built reusable AI workflows using ChatGPT, Codex, Gemini, Google AI Studio, Ollama, ComfyUI, Stable Diffusion, and Flux.
 - Used AI-assisted coding to accelerate prototyping and validate product ideas.
- Application & Game Prototypes

Product Designer • AI Developer

 - Designed and developed interactive prototypes to explore gameplay, interface design, and AI-assisted development workflows.
 - Rapidly iterated concepts using modern AI coding tools.
