INFORMATION TECHNOLOGY SPECIALIST - JOB 2624

July 21, 2026

Hiring Committee
City of Upland - Administrative Services Department
460 North Euclid Avenue
Upland, CA 91786

Dear Hiring Committee:

As an Upland resident and information technology support professional, I am excited to apply for the City of Upland's Information Technology Specialist position. I would value the opportunity to use my technical support experience in service of the employees and departments that keep my own community running. My background combines an Associate of Science in Computer Information Systems with nearly eight years of customer-facing technical work at Apple.

As a Technical Expert and Technical Specialist, I diagnosed hardware, software, account, backup, connectivity, service, and security-related concerns; performed device repair and configuration work; documented findings; and explained technical issues to people with widely different levels of technical experience. I also handled escalated situations, coordinated effective case handoffs, and mentored other technicians on troubleshooting, documentation, communication, and service procedures. My concurrent Apple At Home Advisor assignment strengthened my ability to investigate and resolve problems remotely using careful questioning and clear written case records.

The City's emphasis on dependable end-user support, accurate documentation, security, customer service, and collaboration strongly matches how I have approached technical work throughout my career. My recent website and application projects have further developed my experience with responsive web design, requirements organization, defect investigation, testing, and AI-assisted development. I am prepared to bring this foundation to the City's environment while continuing to deepen my knowledge of municipal network, server, telecommunications, and audiovisual systems.

I would welcome the opportunity to discuss how my technical judgment, patient communication style, local commitment, and record of helping users move from frustration to confidence could support the City of Upland's IT Division. Thank you for your time and consideration.

Sincerely,

Matthew J.S. Solano
