

Matthew J. Solano

Technical Support | Product Thinking | Practical AI

Upland, CA | (909) 329-5490

matthewsolano187@yahoo.com | mjsweb.github.io

PROFILE

Technical support and customer-experience professional with approximately eight years at Apple across remote and in-person roles. Experienced resolving complex hardware, software, connectivity, cloud-service, security, account, and workflow issues while guiding customers through clear next steps. Builds practical AI-assisted products and digital workflows, bringing together technical troubleshooting, product thinking, documentation, testing, and continuous improvement.

EXPERIENCE

Apple - Technical Expert January 2022 – July 2026

Rancho Cucamonga, CA

- Diagnosed and resolved advanced hardware, software, account, connectivity, cloud-service, and Apple ecosystem issues in a high-volume environment.
- Performed device diagnostics and repair, isolated root causes, and explained technical findings in language customers could understand.
- Handled difficult escalations and customer-recovery situations, balancing technical accuracy, empathy, policy, and practical resolution. Mentored teammates on troubleshooting methodology, communication, documentation, repair quality, and service best practices.

Apple - Technical Specialist September 2018 – January 2022

Rancho Cucamonga, CA

- Supported device setup, data transfer, backups, software, Apple ID, privacy, security, connectivity, repairs, and purchasing decisions.
- Translated complex technical concepts into structured guidance for customers with widely different experience levels. Worked across sales, support, and repair functions to move customer issues toward the right solution efficiently.

Apple - At Home Advisor September 2019 – June 2020

Remote

- Delivered remote technical support without physical access to customer devices, using structured questioning, active listening, and step-by-step troubleshooting.
- Documented symptoms, actions, outcomes, and escalation details so cases could be continued accurately across support channels. Maintained productivity, communication quality, and customer trust while working independently in a fully remote environment.

MarketSource - Wireless Manager June 2015 – September 2018

Fontana, CA

- Led daily wireless operations, trained employees, advised customers on mobile technology, and supported inventory, performance, and customer-experience goals.

PROJECTS

Right Side Up Bible

Designed and iteratively refined an AI-assisted Bible application focused on reading continuity, notes, maps, search, responsive layouts, backend data, testing, and debugging.

Application & Game Prototypes

Built and troubleshoot web, mobile, and game prototypes while learning new frameworks, refining UI behavior, and using AI-assisted development to move from concept to working product.

Children's Publishing

Managed manuscript refinement, page planning, illustration workflows, print formatting, metadata, and self-publishing requirements for children's books.

Right Side Up with God

Developed a connected digital brand spanning website, music, publishing, content, and e-commerce planning, using AI tools to support research, creation, organization, and implementation.

Local AI Lab

Hands-on work with ChatGPT, Codex, Gemini, Google AI Studio, Ollama, ComfyUI, Stable Diffusion, FLUX, and local language models to evaluate practical uses and limitations.

AI Music & Content Workflows

Created repeatable workflows for lyrics, style prompts, descriptions, metadata, asset development, release planning, and digital content organization.

TECHNICAL CAPABILITIES

Remote technical support | Root-cause analysis | Hardware and software diagnostics | Customer escalation | Cloud and account support | Networking fundamentals | Technical documentation | Training and mentoring | Product prototyping | AI-assisted development | Workflow improvement | Firebase | Firestore | REST APIs | HTML/CSS/JavaScript | GitHub

EDUCATION & CERTIFICATION

- **Chaffey College**- Computer Information Systems; Business & Technology; Arts & Humanities
- **DeepLearning.AI / Coursera**- Generative AI with Large Language Models
