

MATTHEW J.S. SOLANO

Upland, California | (909) 329-5490 | matthewsolano187@yahoo.com

TECHNICAL SUPPORT | CUSTOMER EXPERIENCE | GENERATIVE AI | PRODUCT PROTOTYPING

PROFESSIONAL PROFILE

Customer-facing technical support and repair professional with approximately eight years of Apple experience across in-store and remote phone support. Brings a foundation in device repair, structured troubleshooting, customer relationship recovery, consultative guidance, and technician mentoring to an intentional progression into generative AI, prompt engineering, and AI-assisted product development.

CORE SKILLS

Technical Support: iPhone and iPad repair, iOS and Apple ecosystem troubleshooting, hardware/software diagnostics, account and service support, remote phone support, case documentation, escalation judgment

Customer Experience: de-escalation, relationship recovery, solution discovery, customer education, business-needs support, purchasing consultation

AI & Product: generative AI, prompt engineering, AI-assisted development, Google AI Studio, ChatGPT, Gemini, Ollama, ComfyUI, Stable Diffusion, Flux

Leadership: technician mentoring, onboarding and training, knowledge sharing, cross-functional collaboration

PROFESSIONAL EXPERIENCE

TECHNICAL EXPERT | Apple | Rancho Cucamonga, CA | 2022-2026

- Diagnosed and repaired iPhones and iPads while isolating hardware, software, account, service, connectivity, data, and ecosystem issues.
- Translated complex findings into clear options, expectations, and next steps for customers with varied levels of technical confidence.
- Recovered strained customer relationships through active listening, ownership, de-escalation, and practical resolution planning.
- Mentored new technicians in diagnostic reasoning, repair workflows, communication, documentation, and escalation judgment.
- Supported purchasing and solution discovery for personal and business technology needs.

TECHNICAL SPECIALIST | Apple | Rancho Cucamonga, CA | 2020-2022

- Delivered hands-on support for iPhone, iPad, iOS, Apple services, accounts, setup, backup, connectivity, accessories, and connected-device experiences.
- Distinguished hardware symptoms from software or service issues and connected customers with the appropriate support or repair path.
- Explained prevention, setup, security, and everyday use in clear language while maintaining an empathetic customer experience.

AT HOME ADVISOR | Apple | Remote | 2020

- Diagnosed technical issues by phone without physical access to the device, using structured questions, confirmation steps, and guided testing.
- Walked customers through complex iOS, account, service, connectivity, settings, and backup troubleshooting while checking understanding at each step.
- Built rapport quickly, de-escalated difficult calls, documented cases, and established a clear resolution or escalation path.

WIRELESS MANAGER | MarketSource | Fontana, CA | 2015-2018

- Led wireless technology consultations, customer service, sales support, and employee training.
- Coached employees on product knowledge, demonstrations, consultative discovery, and customer communication.

EARLIER CUSTOMER, SALES & LEADERSHIP EXPERIENCE | Suncrest; MTE Consulting; Target; Sycotic
Conceptions | Inland Empire, CA | 2011-2016

- Built experience in wireless technology management, sales leadership, employee training, electronics support, customer service, presentations, team operations, and creative problem solving.

SELECTED PROJECTS

Right Side Up Bible App | ACTIVE PROTOTYPE / IN DEVELOPMENT

An AI-assisted Bible reading and study prototype focused on a usable reading, note-taking, search, and exploration experience.

- Role: product planning, feature design, interface iteration, testing, and AI-assisted coding.
- Challenges: keyboard behavior, responsive layouts, reading continuity, search, maps, and clear interaction patterns.
 - Tools: AI coding assistants and iterative design/testing workflows.
- Direction: continue validating core reading and study workflows before presenting the product as complete.

Children's Book Publishing Workflow | PUBLISHED AND IN DEVELOPMENT

A repeatable creative-production workflow spanning manuscript development, illustration planning, layout, and Amazon KDP publishing; Chase the Cheetah is published, while other books remain in development.

- Role: manuscript development, prompt engineering, character-consistency planning, Canva layout, publishing setup, and quality review.
- Challenges: consistent characters and settings, unwanted text, anatomy errors, and page-to-page visual continuity.
- Skills demonstrated: requirements writing, visual QA, iterative problem solving, metadata, and publishing workflow management.

Local AI and Generative Media Lab | ACTIVE LEARNING / EXPERIMENTATION

A hands-on learning environment for local language models and image-generation workflows.

- Tools: Ollama, ComfyUI, Stable Diffusion, Flux, local LLMs, and GPU-based generation.
- Focus: model behavior, prompt structure, workflow design, output evaluation, and local-versus-cloud tradeoffs.
- Direction: turn useful experiments into documented, repeatable workflows without overstating production readiness.

AI Music Production Workflow | ACTIVE PRODUCTION WORKFLOW

A structured AI-assisted process for developing song concepts and organizing releases.

- Tools and activities: Suno, lyrics, style prompting, metadata, YouTube descriptions, tags, and release organization.
 - Challenges: controlling arrangement, pacing, vocal direction, and variation across generated outputs.
- Skills demonstrated: creative direction, prompt iteration, content packaging, and workflow organization.

AI-Assisted Application and Game Prototypes | EXPERIMENTAL / IN DEVELOPMENT

Early application and game concepts used to practice product design, debugging, and AI-assisted coding.

- Role: requirements definition, feature planning, UI iteration, testing, and defect communication.
- Challenges: layout, input, state, animation, and translating natural-language intent into reliable behavior.
 - Status: experimental prototypes, not completed production applications.

EDUCATION & CERTIFICATION

- Chaffey College - A.S., Computer Information Systems; A.A., Business & Technology; A.A., Arts & Humanities
 - Generative AI with Large Language Models - DeepLearning.AI / Coursera

ADDITIONAL TOOLS & WORKING KNOWLEDGE

Google AI Studio, ChatGPT, Gemini, Ollama, ComfyUI, Canva, Amazon KDP, Suno, Stable Diffusion, Flux, local LLM experimentation, product planning, interface iteration, prompt design, and AI-assisted coding.
