APPLICATION SPECIALIST | AI SOLUTIONS | TECHNICAL SUPPORT | PRODUCT IMPLEMENTATION

Technical support professional with approximately eight years of experience solving complex hardware, software, cloud service, networking, and customer account issues in high-volume environments. Experienced translating technical problems into clear solutions while mentoring teammates, recovering customer relationships, and improving support workflows.

Actively design and build AI-assisted products and workflows using Google AI Studio, ChatGPT, Codex, Firebase, Firestore, REST APIs, Ollama, ComfyUI, and modern AI-assisted development tools. Passionate about understanding complex systems, identifying root causes, and building practical solutions that improve customer and operational experiences.

CORE STRENGTHS

Technical Support: Advanced Troubleshooting • Root Cause Analysis • Customer Escalation • Remote Technical Support • Hardware Diagnostics • Software Troubleshooting • Networking Fundamentals

AI & Product Development: Prompt Engineering • AI-Assisted Development • Product Prototyping • Workflow Automation • Google AI Studio • ChatGPT • Codex • Gemini • Ollama • ComfyUI

Technical: Firebase • Firestore • REST APIs • HTML • CSS • JavaScript • GitHub • Responsive UI • Testing • Debugging • Documentation

PROFESSIONAL EXPERIENCE

Apple — Technical Expert (2022–2026)

- Diagnosed complex hardware, software, networking, Apple ecosystem, and account issues.
- Served as an escalation resource for advanced customer cases using structured troubleshooting and root cause analysis.
- Mentored technicians, documented troubleshooting workflows, and restored customer confidence during high-impact situations.
- Collaborated with cross-functional teams to resolve complex technical issues.

Apple — Technical Specialist (2020–2022)

Delivered support for setup, backups, Apple ID, security, connectivity, repairs, software, and purchasing while simplifying complex technical concepts for customers.

Apple — Apple At Home Advisor (Remote) (2020)

Provided remote technical support by diagnosing issues without physical access to devices, guiding customers through advanced troubleshooting, documenting findings, and managing escalations.

MarketSource — Wireless Manager (2015–2018)

Managed wireless operations, trained employees, provided technology consultations, and oversaw daily operational workflows.

SELECTED TECHNICAL PROJECTS

Right Side Up Bible

Designed and continue developing an AI-assisted Bible application featuring Firebase, Firestore, REST APIs, responsive UI, note-taking, maps, debugging, testing, documentation, and iterative product development.

Right Side Up with God Platform

Designed and developed a connected ecosystem bringing together a Bible application, website, publishing, music, apparel, and digital content through AI-assisted implementation and product planning.

Local AI Laboratory

Hands-on experimentation with ChatGPT, Codex, Google AI Studio, Ollama, local Llama models, ComfyUI, Stable Diffusion, and FLUX to evaluate practical AI workflows and applications.

EDUCATION & CERTIFICATION

Chaffey College — Computer Information Systems, Business & Technology, Arts & Humanities coursework
Generative AI with Large Language Models — DeepLearning.AI / Coursera
