

Matthew J. Solano

Technical Support • Product Thinking • Practical AI

Upland, CA • (909) 329-5490 • matthewsolano187@yahoo.com • mjsweb.github.io

Professional Profile

Technical support and customer-experience professional with approximately eight years at Apple across remote and in-person roles. Experienced resolving complex hardware, software, connectivity, cloud-service, security, account, and workflow issues while guiding customers through clear next steps. Builds practical AI-assisted products and digital workflows, bringing together technical troubleshooting, product thinking, documentation, testing, and continuous improvement.

Professional Experience

Apple – Technical Expert (2022–2026)

- Diagnosed advanced hardware, software, account, connectivity, cloud-service, and Apple ecosystem issues.
- Performed diagnostics and repair, identified root causes, and explained technical findings clearly.
- Managed difficult escalations, restored customer confidence, and mentored peers on troubleshooting and documentation.

Apple – Technical Specialist (2020–2022)

- Supported setup, data transfer, backups, Apple ID, privacy, security, connectivity, repairs, and purchasing decisions.
- Worked across sales, repair, and support teams to deliver complete customer solutions.

Apple – Apple At Home Advisor (Remote) (2020)

- Delivered fully remote technical support using structured troubleshooting, documentation, and escalation management.
- Maintained productivity while independently supporting customers from a remote environment.

MarketSource – Wireless Manager (2015–2018)

- Managed wireless operations, trained employees, consulted customers, and supported business performance.

Right Side Up Bible

Designed and refined an AI-assisted Bible application focused on reading continuity, notes, maps, responsive layouts, testing, debugging, and backend workflows.

Right Side Up with God

Built a connected ecosystem spanning web, publishing, music, content, and e-commerce planning.

Application & Game Prototypes

Created web, mobile, and game prototypes while learning new frameworks and AI-assisted development.

Local AI Lab

Hands-on work with ChatGPT, Codex, Gemini, Google AI Studio, Ollama, ComfyUI, Stable Diffusion, FLUX, and local LLMs.

AI Music & Content Workflows

Developed repeatable workflows for music, publishing, prompts, metadata, and digital assets.

Technical Capabilities

Remote Technical Support • Root-Cause Analysis • Hardware & Software Diagnostics • Customer Escalation • Cloud & Account Support • Networking Fundamentals • Technical Documentation • Training & Mentoring • Product Prototyping • AI-Assisted Development • Workflow Improvement • Firebase • Firestore • REST APIs • HTML/CSS/JavaScript • GitHub

Education & Certification

Chaffey College — Computer Information Systems • Business & Technology • Arts & Humanities

DeepLearning.AI / Coursera — Generative AI with Large Language Models
